### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 6, 7, 10, 17, 19, and 27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chiao (U.S. 6,654,664).

Chiao teaches a device (multimedia player) for use in emitting volatile materials from an article 100 containing a volatile material. The device can emit the volatile from the article using different emission modes. For example, the user may edit the programs by adding/deleting scents, overlapping scents, increasing the duration of scents, and decreasing the duration of scents. See col.1, lines 37-42. The emission of scent is at least partially controlled by operation of fan 460 which is controlled by controller 380, which is in turn controlled by the user edited scent recovery programs. See col.5, lines 61-64; col.11, lines 11-23 and lines 49-59; col.13, lines 52-57. Chiao specifically discloses that the fan is activated for a predetermined period of time (duration) to release a desired scent. Although not specifically discussed by Chiao, it would have been obvious that the user edited program would also have controlled the intervals between fan operation, as it is clear from the disclosure of Chiao that the fan is activated intermittently according to the scent recovery sequence. Moreover, it is deemed obvious that an intentional decrease in the duration of scent would cause a decrease in the concentration of the scent. Chiao

further discloses that information, such as scent identification, is stored on the article **100** for each volatile material. See col.6, lines 22; col.9, lines 10-23.

### ***Response to Arguments***

3. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***
